

FH Reference: 125592	Project : Berryhill Landslip Remedial Works	Date of Site Visit: 23/12/2019
<p>Mansfield District Council (MDC) have appointed Fairhurst to undertake regular site inspections of the quarry wall between completion of the emergency response works (w/e 24<sup>th</sup> November 2019) and the commencement of the permanent works in this portion of the quarry in early 2020.</p> <p>During a recent inspection on Friday 23<sup>rd</sup> December 2019, the weather was cloudy with sunny spells and intermittent drizzle.</p> <p>A photographic record of the quarry has been collated and is updated after each inspection. Only small, local visible changes have been noted from the previous site visit (16/12/2019). Two vegetation clumps approximately 30cm<sup>2</sup> were present on top of a small scale failure (previously reported on the 24/11/2019) located in the rock trap at the toe of the slope. Fairhurst are not aware of any reported issues to MDC and the garden heras fencing remained in situ as agreed. No increase in risk has been determined from the recent inspection.</p> <p>If residents see or hear anything associated with the cliff face, please call 01623 463 050 to report this to the Council.</p> <p>Photographs included overleaf.</p>		
Prepared by: Joshua Blacker Engineering Geologist, Fairhurst		Date: 23/12/2019
Distribution:		
<p>Mansfield District Council – James Biddlestone</p> <p>For distribution to affected residents on Stone Bank and Bank End Close.</p>
