Introduction

Disclaimer

This document supersedes all previous Housing Land Monitoring Reports (including Housing Land Availability Studies), produced by Mansfield District Council. The identification of a site in this document does not necessarily imply that planning permission will be granted for a specific housing proposal, as this would be dependant on detailed analysis at the time that a planning application is considered.

Potential developers are advised to contact the district council.

Five Year Land Supply

1. Policy Background

Paragraph 73 of the NPPF requires that local planning authorities “*identify and update annually a supply of specific deliverable sites sufficient to provide a minimum of five years’ worth of housing against their requirement*”. As part of this, a buffer moved forward from later in the plan period should be included. The buffer should be 5% but is increased to 20% where there is evidence of significant under delivery; essentially this means that we are required to demonstrate a supply of either a 5.2 year or 6 year supply of deliverable sites.

Paragraph 73 also requires that strategic plans include a housing trajectory to illustrate the expected rate of house building.

As set out in Paragraph 11 (footnote 7), where local planning authorities are unable to demonstrate a five year housing land supply, policies for the supply of housing should not be considered up to date. This means that the presumption in favour of sustainable development is used to determine residential planning applications.

2. What period is covered?

The assessment period is based on financial years which run from 1 April to 31 March each year. This report presents the situation from 1 April 2018 to 31 March 2023:

- Year 1 – April 2018 to March 2019
- Year 2 – April 2019 to March 2020
- Year 3 – April 2020 to March 2021
- Year 4 – April 2021 to March 2022
- Year 5 – April 2022 to March 2023

As part of the process of submitting the Local Plan for examination a partial update of the housing supply situation was undertaken. This updated information on the sites identified in the trajectory as of 1st October 2018. The assessments in this report are based on the information collected as part of this partial update. A full update will be prepared after 31st March 2019.

3.What can count towards the housing supply?

The Use Class Order sets out the categories of different types of development. It identifies the following types of residential uses:

- C2 - Residential accommodation and care to people in need of care, residential schools, colleges or training centres, hospitals, nursing homes
- C3(a) – use by a single person/family
- C3(b) – use by up to six people living together and receiving care
- C3(c) – up to six people living together a single household (e.g. a small religious community or a homeowner and lodger)
- C4 – Houses in Multiple Occupation (HiMOs) – between three and six unrelated individuals living in their main and only residence and sharing basic amenities (e.g. kitchen, bathroom etc.).

Only buildings in Use Class C3 (a, b or c) can count towards the housing supply; this includes sheltered accommodation. Other uses including care homes (which fall into C2), HiMOs and purpose built student accommodation do not count towards the housing supply but will be recorded to present the full context of residential developments in Mansfield.

As is set out in paragraph 73 of the NPPF sites must be ‘deliverable’; this means that the site is:

- suitable now;
- available now; and
- achievable with a realistic prospect that housing will be delivered on the site within five years.

Non-major development and sites with detailed planning permission (i.e. sites which have full permission or a reserved matters approval) are considered to be suitable and available for residential development; a view will be taken on whether there is sufficient clear evidence that they are deliverable during the next five years. Sites which have outline permission or permission in principle are also considered suitable and available but are only considered deliverable where there is clear evidence that housing completions will begin on site within five years.

Sites where planning permission has lapsed or not yet been granted are not included in the five year housing supply. Sites where permission has lapsed are less likely to be achievable. It is yet to be established that sites where permission has not been granted are suitable for development. While some sites without planning permission are highly likely to be suitable there are a number of stages to go through to get planning permission and start delivering homes such that it is less likely that they will be built during the next five years.

Sites to be allocated by the Local Plan could also be developed during the next five years following adoption of the Local Plan. However, as these sites do not currently have planning permission they do not form part of this report.

Windfall sites are defined as sites which have not been specifically identified as available in the Local Plan process. They normally comprise previously-developed sites that have unexpectedly become available. It is set out in paragraph 78 that an allowance for windfall can be made as part of the five year housing supply provided where there is compelling evidence that they will provide a reliable source of housing.

It is not proposed, however, to include an allowance for windfall in the five year housing supply. Windfall is, by nature, uncertain and excluding windfall makes the housing supply more robust and less open to challenge.

4. What is the housing requirement?

In advance of the adoption of an up to date Local Plan the housing requirement for the five year period is made up of two elements:

1. Local Housing Need; and
2. The appropriate buffer.

Following adoption of the Local Plan any shortfall against the housing target during the plan period (i.e. since April 2013) will need to be added into the requirement. As set out in government guidance, the shortfall should be addressed during the next five year period (an approach known as the Sedgfield approach) rather than over the remaining plan period (known as the Liverpool approach).

1 – Local Housing Need

As the adopted local plan is more than five years old, paragraph 73 of the NPPF requires that the five year supply situation is assessed against the local housing need identified using the standardised housing methodology. This uses information on household projections and affordability to establish the number of homes that need to be built.

New household projections were issued in September 2018. However, following their release the Government has released a technical consultation proposing a number of changes to the NPPF and NPPG¹. To address concerns with the projections released in September 2018 the Government have proposed three actions:

1. Use of the previous projections (those released in 2016) to provide the baseline for local housing need in the short term;
2. Clarification that lower housing numbers based on the 2018 projections is not an exceptional circumstance to justify departure from the standardised methodology; and
3. Establish a new methodology by the time of the next household projections.

Based on the 2016 projections housing need in Mansfield district over the period 2018 to 2023 has been assessed as 279 homes per annum².

Through the preparation of the Local Plan a different housing target may be set. This will take account of a variety of different factors including economic growth and environmental constraints. However it is only when adopted that the housing target in the Local Plan can be used to assess whether there is a five year housing land supply.

¹ <https://www.gov.uk/government/consultations/changes-to-planning-policy-and-guidance-including-the-standard-method-for-assessing-local-housing-need>

² This is based on the 2016 Household Projections released 20th September 2018.

2 – The appropriate buffer

Paragraph 73 of the NPPF sets out that a buffer of either 5% or 20% should be added to the housing supply required during the five year period depending on whether there has been significant under delivery of housing over the previous three years. This buffer is brought forward from later in the plan period and provides an additional range of sites to developers to give the best possible chance of the housing need being delivered. The NPPF sets out that significant under delivery means deliver of 85% or less of the housing requirement.

During the last three years (2015/16 to 2017/18) 995 homes were built compared to a requirement for 837 (279x3). This means 119% of the housing requirement has been built and there is not been significant under delivery.

The Housing Requirement

This means that the housing requirement is as follows:

Element	No. of Homes	Note
Local Housing Need (April 2013 to March 2023)	1395	279x5
Appropriate Buffer (April 2013 to March 2023)	70	5% of 1395
Housing Requirement	1465	

Therefore, there is a need to provide a supply of homes of at least **1465 homes** between April 2018 and March 2023.

If the housing target in the emerging Local Plan were used the Housing Requirement for April 2018 to March 2023 would be 1706 homes (i.e. (325x5)+5%).

As the buffer is brought forward from later in the plan period it does not form part of the revised target; if any of the buffer is built it would lead to a reduced housing target in later years of the plan.

5.What is the housing supply?

As is set out above the housing supply is made up of 'deliverable' housing sites; deliverable means that the site is suitable, available and likely to deliver homes in the next five years. This is exclusively made up of sites with extant planning permission (either full or outline).

However the total number of homes with extant planning permission on deliverable sites cannot be assumed to be the housing supply. Account must be taken of a number of factors including:

- the need for reserved matters to be approved for outline planning permission;
- the need for opening up works for larger sites;
- the need for pre-commencement conditions to be discharged; and
- the likely number of homes to be built each year.

Together these factors reduce the number of homes that can be realistically built during the five year period.

Information on delivery comes from a number of sources including the developers themselves and analysis of past delivery. Delivery information and justification for individual sites is set out in the HELAA. This results in the following predicted supply:

Year	Period	No of Homes Predicted
1	April 2018 to March 2019	510
2	April 2019 to March 2020	420
3	April 2020 to March 2021	426
4	April 2021 to March 2022	340
5	April 2022 to March 2023	341
Total		2037

A trajectory covering the Plan Period (2013 to 2033) is provided at the rear of this document. This shows only sites with planning permission which will contribute to the supply during the next five years. Sites with 4 or fewer dwellings are not included in the HELAA and it is assumed that they will be completed during the first three years. Please note that other information in this document shows all sites with extant planning permission not just those expected to be delivered during the next five years.

6.Comparison of requirement and supply

The table below sets out the comparison of the Housing Required against the Supply for the five year period (April 2018 to March 2023).

	Number of Homes	Percentage (1395 homes)	Years of Supply (279dpa)
Housing Supply 1st April 2018 to 31st March 2023	2037	146%	7.30

As can be seen there is currently a Five Year Housing Land Supply when assessed against Local Housing Need.

The table below sets out the Five Year Housing Land Supply situation when assessed against the housing target proposed by the council in the emerging Local Plan (325 dwellings per annum). As noted above this figure has not yet been tested at examination and may change; as such the assessment is provided for information purposes only.

	Number of Homes	Percentage (1395 homes)	Years of Supply (325dpa)
Housing Supply 1st April 2018 to 31st March 2023	2037	125%	6.27

7.Next Steps

The following actions are required to ensure that the Five Year Land Supply situation is maintained:

- Continue to monitor housing delivery;
- update the five year land supply situation to 31.03.19; and
- Ensure adoption of the Local Plan.

Housing sites - status

Figure 1.

	Large sites	Small sites	Total
Housing sites with planning permission			
No. of sites	44	133	177
No. of sites where there has been a commencement	19	35	54
No. of sites where there has not been a commencement	25	98	123
Housing sites supported subject to the signing of a Section 106 Agreement			
No. of sites	9	1	10

N.B.

The above figures relate to housing sites. It should be noted that sites are often made up of several planning permissions, and therefore where any permission relating to the site has been implemented this constitutes as a site commencement.

Remaining dwellings with planning permission

Figure 2.

	Outline	Detailed	Total
No. of Dwellings on large sites			
Not started	443	2570	3266
Under construction	44	171	215
Total	487	2741	3481
No. of Dwellings on small site			
Not started	67	211	278
Under construction	2	48	53
Total	69	259	331
No. of Dwellings on all site			
Not started	510	2781	3544
Under construction	46	219	268
Total allowance	556	3000	3812

N.B. This is a total amount of homes, not just those in the first five year period.
 For the purposes of figure 4, prior notifications, changes of use and conversions have been included within the detailed figures as they can be implemented without requiring further planning permission. Please note that supported applications awaiting section 106 agreements are not included.

Remaining dwellings on implemented planning permissions

Figure 2a.

	Outline	Detailed	Total
No. of Dwellings on large sites sites over 10 dwellings			
Not started	38	610	648
Under construction	44	171	215
Total	82	781	863
No. of Dwellings on small site sites under 5 dwellings			
Not started	0	9	9
Under construction	2	48	53
Total	2	57	62
No. of Dwellings on all sites			
Not started	38	619	657
Under construction	46	219	268
Total allowance	84	838	925

N.B. For the purposes of figure 4a, prior notifications, changes of use and conversions have been included within the detailed figures as they can be implemented without requiring further planning permission. Please note that supported applications awaiting section 106 agreements are not included.

Remaining dwellings on non-implemented planning permissions

Figure 2b.

	Outline	Detailed	Total
No. of Dwellings on large sites sites over 10 dwellings			
Not started	405	1960	2618
Under construction	0	0	0
Total	405	1960	2618
No. of Dwellings on small site sites under 5 dwellings			
Not started	67	202	269
Under construction	0	0	0
Total	67	202	269
No. of Dwellings on all site			
Not started	472	2162	2887
Under construction	0	0	0
Total allowance	472	2162	2887

N.B. For the purposes of figure 4b, prior notifications, changes of use and conversions have been included within the detailed figures as they can be implemented without requiring further planning permission. Please note that supported applications awaiting section 106 agreements are not included.

Housing sites with planning permission

This section of the Housing Monitoring Report provides details of all housing sites either available in full or in part. Data is provided by Ward and includes information on the type of site e.g. 'Greenfield' or 'Brownfield' and any progress that has been made.

To avoid double counting and ensure the number of dwellings to be delivered on a SITE is reflected accurately, the planning reference will only show the balance of dwellings which can be built under that permission. Therefore the number of dwellings shown against each planning reference will not always match the number stated on the original permission.

e.g. Where an original outline for 100 dwellings is partly superseded by a reserved matters for 50, the dwelling number shown against the original outline will change to reflect the residual balance i.e. 50

Housing sites supported subject to signing a section 106 agreement

This section of the Housing Monitoring Report provides details of all housing sites which are supported by the authority, but currently are dependant on the signing of a Section 106 agreement for their planning permission. Data is provided in ward order and includes information on the type of site e.g. 'Greenfield' or 'Brownfield'.
