

Mansfield Trade Waste

Wheeled containers for waste and recycling

Our red bins are for general waste. For those with a green conscience we can provide grey trade recycling bins.

These wheeled containers are suitable for small quantities of dry non-hazardous, light, compactable waste. They're totally enclosed with strong plastic lids. Larger models (660l and above) have lockable lids and footbrakes. All containers are made from durable plastic or metal and can be easily stored inside or outside your business.

Trade waste bins are easy to clean and promote a clean and tidy environment for your business. Our trade waste collection and recycling services are reliable, affordable and customer friendly. We offer regular collection days, extra collections on request and you can upscale or downsize the bin to your requirements.
